Day-Planner | github.com/toveson/Day-Planner | toveson.github.io/Day-Planner/

- This application gives users the ability to easily save appointments to hour time blocks.
- Tools used: Bootstrap, Font AwesomeTools, JQuery, Moment, HTML, Javascript, CSS

PROFESSIONAL EXPERIENCE

Inventory Specialist, Clear Home, Orem, Utah

2011 – Current

Began working at Clear Home as an installation technician but was soon promoted to a lead technician position in which I managed other technicians. In 2017 I moved into a corporate role assessing quality control on installations. This position evolved into a regional field supervisor position the following year, where I supported offices across the country by traveling and working with regional managers as well as the inventory team to make sure the needs of the company were met. In 2019 I accepted a position with the inventory team to take a break from traveling and occasionally complete DirecTV, Viasat, and Nest installations. As inventory specialist, I ensure that equipment is properly consumed nationwide, while coordinating with the senior inventory manager and regional managers to ensure the needs of

every office are met.

EDUCATION

Bootcamp Full Stack Web Development Certification: The University of Utah, Salt Lake City, UT, January 2021

G.E.D: Utah Valley University, Orem, Utah (2007 I think)
